

Nguyễn Thế Phong

Date Of Birth: 04/10/2004

Phone: 0365022794

Email: phongnguyenphong267@gmail.com

Address: Đống Đa, Hà Nội

PROFESSIONAL SUMMARY

Frontend Developer with nearly 3 years of practical experience. Deep expertise in the React ecosystem (ReactJS, React Native, TypeScript) in developing large-scale CMS systems for administration and e-commerce applications. Proficient in TanStack Query, React Hook Form + Zod, optimizing performance for large datasets; possesses a solid foundation in React Native.

TECHNICAL SKILLS

- **Web Development:** ReactJS (React 18/19), React Native, TypeScript (strict typing), Responsive Web Design (Tailwind CSS v4).
- **State Management:** TanStack Ecosystem (TanStack Query, TanStack Table), Zustand (Slices pattern), Redux Saga, Context API.
- **Integration & Authentication:** OAuth 2.0 (Social Login), REST API (Axios Interceptors), Deep Linking
- **Performance & Optimization:** List Optimization, React.memo, Flipper Profiling
- **Reporting & Data:** ExcelJS/xlsx-js-style, DevExpress Reporting & Report Designer, pdf.js + react-pdf-viewer, Recharts, EditorJS, drag-and-drop builder (dnd-kit)
- **Tools:** Git (branching strategy), AI-Assisted Development (Cursor + Claude AI), VS Code

WORK EXPERIENCE

GHMSoft — Frontend Developer (ReactJS)

1/2026 - Present

FrontEnd Developer

- Developed and maintained large-scale admin CMS systems (HR, Clinic & Consumable Inventory Management) built on ReactJS 18 + TypeScript + Vite 5.
- Implemented security & authorization systems: integrated ForgeRock IAM login (OAuth2 + PKCE) and two-tier CASL authorization.
- Reporting & Data: ExcelJS/xlsx-js-style, DevExpress Reporting & Report Designer, pdf.js + react-pdf-viewer, drag-and-drop builder (CraftJS, dnd-kit).

Eatsy JSC — Frontend Developer (ReactJS)

8/2023 - 12/2025

FrontEnd Developer

- Optimized state management (Zustand Slices, Redux Saga) and render flow via React.memo and Flipper Profiling.
- Handled large datasets (10,000+ rows) smoothly using TanStack Table v8 combined with TanStack Virtual.
- Built an app-wide lazy-load architecture with Suspense and react-error-boundary, integrated Firebase FCM for push notifications, and prevented memory leaks via effect cleanup.

PROJECTS

QLPK: Clinic & Consumable Inventory Management CMS (TT Medic)

1/2026 - 8/2026

FrontEnd Developer

Clinic Management System

- **Platform:** Web (Admin CMS)
- **Scope:** Inventory management, period-end stock declarations, material usage/export reporting, service catalog, examination form layout configuration.
- **Role:** Responsible for structural analysis and implementing the UI from Figma designs. Investigated environment variables, established outside-in logic flow, and handled complex data flows. Ensured smooth UI performance when loading large inventory lists.
- **Website:** <https://qlpk.ttmedic.vn/admin/home>

Eatsy-CMS

8/2023 - 12/2025

ReactJS Developer

Eatsy CMS: Content, User & Order Management

- **Platform:** Web (Admin CMS) .
- **Scope:** Platform operating all content, menus, users, and orders for the Eatsy application.
- **Role:** Designed and integrated APIs for core modules. Built reusable shared components (such as Recharts charts and dnd-kit drag-and-drop) that helped the team accelerate new feature development and maintain UI/UX consistency.

Eatsy App

8/2023 - 12/2025

React Native Developer

Eatsy — Health & Nutrition Mobile App

- **Platform:** iOS & Android (React Native)
- **Technology:** React Native, Node.js, PostgreSQL, AI Food Recognition
- **Role:** Primary developer of mobile app UI modules.
- **App link:** eatsyvn.app.link/QaUq7EJsttb

CAREER OBJECTIVES

Short-term: Strengthen ReactJS technical foundation at an in-depth level, focusing on admin CMS systems and e-commerce websites — contribute value by quickly grasping projects, working with the team to optimize product performance and development processes.

Long-term: Aim for a Senior Frontend Developer position, mentor juniors and make long-term technical decisions. Focus on building an AI-first mindset in the development process — not just using AI as a tool but integrating it into the whole team's working culture.

EDUCATION

University of Transport and Communications

2022 - 2026

Major: Information Technology.

INTERESTS

Reading books and materials on technology, experimenting with new tools and technology trends.
